

ONCE® AgriShift® fixtures have a **Built For Your Barn®** design, using techniques and materials that withstand the harsh barn environment for years to come.

AgriShift® lighting systems are agriculture specific and developed to meet the individual needs of your animals¹. The lights "shift" spectrum and intensity.

Animal-Centric Lighting Systems

The AgriShift® STC is a stringer connector designed with the flexibility to fit any ONCE® ML fixture. The various AgriShift® STA drop cord adapter lengths allow for easy installation, reducing installation costs.

Attaching to the ceiling of barns up to 152 meters long, the AgriShift® STC comes in 25 or 30 1/2 meter lengths, with 2.43 or 3 meter sections. The durable, Built For Your Barn® design allows the stringer to withstand harsh barn environments for years to come, while giving each producer the opportunity to provide a species-specific light spectrum for their animals.
